Quotes from Students

***David Wullimann**, Lund University*: Research at University of Zurich.
"I am very happy with my exchange period and I am sure I will have great use in the future with the experience that I had.
I now have many reasons to go back and visit Switzerland, and there is still much more to explore culturally, new people to meet
and work opportunities to discover. I was met by great people who taught me a lot, not just new techniques but also how to work in a lab group."

***Linda Ravazzano**, University of Milan:* Research at Leiden University.
"Taking part to the STREAM programme had been a great opportunity to work in a true research project inside an international research group. This experience not only made me grow up under an academic point of view, but also gave me the opportunity to discover a new country and to meet people from all over the world".

***Marnix van de Sande**, Utrecht University*: Research at University of Zurich.
"The STREAM programme offered me the opportunity to experience research first-hand, which really helped me in discovering my own passions and qualities. I am really grateful that I got the chance to take part in an ongoing research project as a fresh BSc graduate. The experiences in the lab have given me a solid impression of what work in a biomedical research lab is like, and this helped me a lot in the choice for a master's degree. I have a much more realistic view of what life as a PhD student is like, and I now know better what to expect if I decide to continue in research".
