

Osteology internship at Archol

Who are we?

Archol has been a leading archaeological company for more than 25 years, where quality is of paramount importance. In our projects, we always look for a balance between the interests of our clients and the opportunities for archaeology and society. Our office is located in the Faculty of Archaeology of Leiden University.

What are you going to do?

In 2021, archaeological work was carried out in the 'Nieuwe Kerk' in Delft. More than 500 individual human skeletons from the late and post-Middle Ages have been recovered.

Research is currently ongoing, and we offer the possibility to support this. The work initially consists of correctly identifying human skeletal parts and dental elements, distinguishment between left and right sides and measuring bone lengths. If experienced, performing other analyses like sex and age estimation can be part of the internship as well.

Who are you?

- (Bachelor/Master) student;
- For Leiden students: You have completed the BA2 seminar in Osteology. For others, you have a detailed knowledge of skeletal and dental anatomy and experience with taking bone measurements;
- Available at least 3 weeks in a row between 26 June and 1 September 2023.

What can we offer?

- An internship where you can increase experience in osteological analyses supervised by Steffen Baetsen;
- A (small) internship allowance;
- A beautiful workplace at the Faculty of Archaeology in Leiden.

Interested?

Please let us know if you are interested. You can send us a (short) letter of motivation by e-mail. You can send the motivation to info@archol.nl. Please direct the e-mail to Steffen Baetsen.

If you have any questions about this internship, please do not hesitate to contact us. We can be reached by phone; at 06 36383991. Or by e-mail; info@archol.nl.
