

| BA Thesis Supervisors 21/22 | | ARCHAEOLOGY |
|--|--|--------------------|
| Supervisor | Expertise | |
| Prof. P.M.M.G. Akkermans | Near Eastern Archaeology, with an emphasis on Neolithisation | |
| Dr. C.E. Ariese | Museum studies, community engagement and decoloniality, indigenous knowledge | |
| Dr. Q. Bourgeois | Burial Mounds and Funerary archaeology combined with network analysis and GIS approaches in later prehistory of Europe | |
| Dr. D.J.G. Braekmans | understanding of the nature and use of natural resources, and material objects. | |
| Prof Dr. A. N. Brysbaert | Ancient technology, crafts and materials in the east Mediterranean | |
| Prof. R. T.J. Cappers | Archaeobotany, with emphasis on the spread of agriculture and trade in the Near East | |
| Prof. R.H.A. Corbey | Philosophy of Science and Anthropology: Human cognition, sociality and cultural behaviour in an evolutionary perspective | |
| Dr. M. De Campos Francozo | Museology, with emphasis on museum collections, history of collections and provenance studies, specially but not exclusively focused on Latin America. | |
| Prof. P.A.I.H. Degryse | Archaeometry, focused on the exploitation and use in ancient times of industrial minerals and ores. | |
| Prof.dr.ing. D.J. de Vries | Origin and application of historical building materials and constructions, with emphasis on traditional European architecture | |
| Dr. M. de Waal | Island and coastal archaeology with a focus on the Caribbean and archaeological prospection | |
| Dr. ir. M. Driessen | (Military) logistics, infrastructure and trade in the Roman period | |
| Dr. B.S. Düring | Near Eastern Archaeology, with emphasis on the emergence of social complexity and the archaeology of imperialism | |
| Dr. G. Dusseldorp | Behaviour of Pleistocene hunter-gatherers both in Northwest Europe and South Africa. | |
| Dr. M.H. Field | Archaeobotany, with emphasis on the Mid- to Late Pleistocene in Europe and putting archaeology into a stratigraphical and palaeoenvironmental context. | |
| Prof. D.R. Fontijn | Archaeology of early Europe, with special attention to the Bronze Age and (early) Iron Age | |
| Dr. A. Geurds | Archaeology of the Isthmo-Colombian Area & Mesoamerica, focusing on landscape, identity and monumentality. History and theory of archaeology, aspects of Contemporary Archaeology, as well as collaborative archaeology in the Americas. | |
| Dr. A.G. Henry | Plant microremains in archaeological context and plant food consumption by Neanderthals and Early modern Humans | |
| Prof. C.L. Hofman | Archaeology of the Americas, with emphasis on the deep history of the Caribbean and adjacent areas, settlement archaeology, material culture studies, and community engagement | |

| | |
|---------------------------|--|
| Dr. R. Jansen | Field Archaeology, Applied Archaeology, Iron Age and (Early) Roman Period in Europe |
| Dr. T. Kalayci | Sensor data integration, urban studies, environmental modelling, production landscapes, and landscapes of movement within Near Eastern and Mediterranean contexts |
| Prof. dr. J.C.A. Kolen | Landscape Archaeology and Cultural Heritage of Landscapes from a heritage management perspective |
| Dr. M. Kerschner | Classical archaeology, the archaeology of Greek and Western Anatolian cultures in the Early Iron Age, the Archaic and the Classical period. |
| Dr. M. Kuijpers | Craft, cognition, skill, material histories, technologies, and/or disruptive innovations; specifically metalworking and domestication. Also: The relevance of archaeology; Prehistory of Europe. |
| Dr. J.E. Laffoon | The integration of bioarchaeological and biochemical approaches to the study of patterns of mobility/migration, diet, and exchange. |
| Dr. K. Lambers | Digital and computational archaeology, with emphasis on surveying, 3D recording, remote sensing, modelling, spatial analysis, and digital image analysis. |
| Dr. L. Llorente Rodriguez | Archaeozoology; development and evolution throughout time; hunter-gatherers economies and the transition to agropastoralist economies; domestication processes. |
| Dr. A.J. Louwen | Bronze Age Landscapes in NW Europe |
| Dr. M.R. Manders | Cultural heritage, maritime archaeology, maritime history, underwater archaeology |
| Dr. K. MacDonald | Human Evolution: development of brains and cognition, ecological niche and adaptive flexibility through processes including innovation and social learning |
| Dr. J.A. Mol | Geoarchaeology; prospection, landscape development in Europe |
| Dr. A. Politopoulos | Archaeology of the Late Bronze and Early Iron Age Eastern Mediterranean; Archaeology of Empires; Video Games and Media Archaeology. |
| dr. ir. F. Scherjon | Neanderthal distribution in North-western Europe as a case study for modelling and simulating past hominins in a realistic environment. |
| Dr. R. Schats | Osteoarchaeology and palaeopathology in a comparative perspective, with emphasis on medieval health and disease |
| Dr. S. Schrader | Osteoarchaeology: bioarchaeological reconstruction of daily activities |
| Dr. I.R. Simpson | Archaeology of early Islamic and medieval to modern periods in the Middle East and global interconnections. |
| Dr. A. Sorensen | Palaeolithic Archaeology/Human Origins, Material Culture Studies, Geology, with an emphasis on the role of fire in human evolution |
| Prof. M.A. Soressi | Hominin Diversity Archaeology, with emphasis on the Middle Palaeolithic, the Early Upper Palaeolithic, and application of archaeological sciences to Palaeolithic archaeology. |
| Prof. dr. P.J. ter Keurs | Museums, Collections and Society, with emphasis on critical museums studies and the study of material culture. |

| | |
|---------------------------|--|
| Dr. M.E.J.J. van Aerde | The archaeology of connections between ancient East Africa and the Indian Subcontinent. This includes Indian Ocean maritime trade, Persian land routes and Himalayan rock art studies. |
| Dr. M. van den Dries | Archaeological heritage management, including public archaeology, governance and legislation |
| Dr. R. van Oosten | Urban and Medieval Archaeology; Low Countries: ceramics; historical GIS. Theses with an early medieval topic are also welcome. |
| Dr A. Verpoorte | Palaeolithic of Europe, with emphasis on the first modern humans in Europe, Neanderthal behavioural ecology and evolutionary approaches to archaeology. |
| Prof. M.J. Versluys | Classical and Mediterranean Archaeology, with emphasis on the cultural dynamics of the Hellenistic-Roman world |
| Prof. J.A.C. Vroom | Medieval and Early Modern Eurasia, specializing in the material culture of the 7 th to 19 th centuries |
| Drs. M. Wansleeben | Predictive Modelling, Data Analysis |
| Prof. dr. J.K. Zangenberg | Ancient Judaism and Early Christianity, focused on the place of ancient Jewish communities in Greco-Roman context |
