

## Placement and accommodation conditions – Plexus Student Centre and International House

Plexus Student Centre aims to facilitate student organisations to the best of its ability and assist them with their plans and activities when required.

Plexus Student Centre aims to provide a good service. In return, we expect that the organisations that use Plexus Student Centre and International House do their utmost to make a positive contribution to the student environment, Leiden University and society in general.

Student organisations are eligible for accommodation and support services if they:

1. play a role in knowledge enrichment;
2. organise activities for the entire student population;
3. contribute to university policy;
4. have a humanitarian objective;
5. are registered with the Chamber of Commerce.

Plexus Student Centre and International House are in principle not intended for student organisations that:

1. have their own premises;
2. are officially affiliated with a faculty;
3. are primarily focused on sports or purely 'fun' activities;
4. only welcome members from one particular student association or one particular background. All Leiden University students should be able to join the student organisation, regardless of background;
5. undertake commercial activities.

The Head of Plexus Student Centre will discuss all placement requests with the Plexus Advisory Group. It should be noted that Plexus Student Centre is not able to place all organisations that meet the above-mentioned criteria. Placement depends on a number of practical factors, such as the availability of office space and workstations.
